

high-pressure split-flange coupling caps **CODE 62 CCH SERIES**

Designed to protect the machined surfaces of high pressure Code 62 split flanges.

Our caps push on easily and lock securely with a unique internal bead that accommodates both the standard high pressure flange thickness and the thicker “Caterpillar style” flanges. Translucent caps provide o-ring visibility.

Specifications

- *Material: Low-Density Polyethylene*
- *Color: Natural*

CODE 62 Part Number	Flange Size	Dash Number	A To Fit Flange Head Diameter	B To Fit Flange Head Thickness	C To Fit Flange Head Thickness	Standard Package
