

outside-fitting flange protectors **EP 310 SERIES**

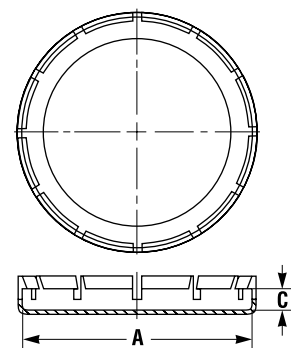

Finally, a true full-face flange protector that is easy to install and remove. No pulling or tugging. Just simply push over the flange diameter. This unique style automatically slips over the flange to protect the face as well as the sides. Much easier to remove than any other full-face, wrap-around protector on the market. Its unique style allows coated and conical bore flanges to be easily protected.

Specifications

- **Material:** Low-Density Polyethylene
- **Color:** Yellow

Meets ANSI B 16.5

DIN sizes are available; call or e-mail Caps'n Plugs for quote and delivery.
